#### Talking Tarot: The Symbols Speak

Every Wednesday

\$7 (half goes to support the Library)

The Tarot Group has been an incredibly spiritual bonding experience, not to mention just plain fun. Few if any of our classes have required any prior knowledge of the Tarot, but all have required a willingness to explore our own intuition.

This series will again approach the Tarot from that viewpoint, learning about it by speaking its own language – that of symbolism.

If you own a Tarot deck, please bring it for our weekly spread. But we always have extra decks, so it's not necessary to purchase one.

Contact Kathy Eckert at [kathy@seattlemetaphysicallibrary.org](mailto:kathy@seattlemetaphysicallibrary.org) or just show up – What's Tarot without Serendipity?

## History Redux Revisionist History Study Group

Monday, January 4, 2016

Free for members, \$5 for non-members.

This is an older book, and does not have a lot of the newer material, but we chose it because it is a classic that almost all researcher reference. It's amazing how close his conclusions are to the new book recently released by Graham Hancock, *Magicians of the Gods*.

This is written back in the days before we had institutionalized academic research, and people used logic and evidence to argue their cases, rather than referring to "authorities" and previous academic research.

It's quite interesting to see how natural science has changed it the past hundred years. He makes a case that the soil deposits found in North America and northern Europe are NOT glacial deposits, but from a catastrophic comet. He then looks at various indigenous legends from around the world to show that people lived through that collapse, but it had a serious effect on the human psyche that continues to this day.

.You need not have read the book to attend the discussion. Those who have read the book will recount to the others what they remember..

## Why Relationships Don't Work: Releasing Your Bag of the Past

Sandy Levey-Lunden

Tuesday, January 19, 2016, 7 pm

Free to members, \$5 suggested donation for  
non-members

In this dynamic presentation Sandy Levey-Lunden will demonstrate how our conflicted and incomplete relationships of the past (mom, dad, ex-lovers, etc.) are projected onto the relationships we're having in the present. This workshop includes interactive activities to help people look at the ongoing process of a relationship and the purpose of it. She then helps people find the issues in their bag of the past and shows people how to release them. She demonstrates how to release the scenario in relationship – 'why is the same thing happening to me again, and again.'

# LIFE ON MARS

Dr. J.E. Brandenburg

---

Xenon isotopes in the Martian atmosphere provide hard evidence of a massive thermonuclear explosion on Mars. Dr. Brandenburg is a plasma physicist with NASA exploration experience, and has presented technical papers at scientific conferences on evidence of Martian civilization. In his recent [interview on Coast to Coast](#), he indicated that he was given the go-ahead to disclose this material, and he also suggested that the recent release of NASA photographs showing clear evidence of Martian civilization shows that disclosure is happening NOW.
