Shamanic Healing: Traditional Medicine for the Modern World by Itzhak Beery and Alberto Villoldo, 2017

Itzhak Beery, a shamanic healer with twenty years' experience, shares wisdom from two of his teachers, a Yachak from Ecuador and a Brazilian Pagé. He details medicine tools and soul healing techniques including diagnosis and energy cleansing with plants, stones, fire, rum, eggs, flower essences, and sound. He shares protection and self-defense techniques for confronting negative energies, such as spirit attachment and possession. Sharing healing stories that each address a specific condition, Beery explains how a shaman will consult with the patient's soul to determine its needs, which sometimes includes learning from the illness experience.

Beery reveals the importance of shamanic practices in resolving our 21st-century emotional and physical problems and their importance to the future of humanity and the planet.

Sekhmet: Transformation in the Belly of the Goddess by Nicki Scully and Hank Wesselman Ph.D., 2017

Sekhmet is the Egyptian lion goddess, fierce protector of truth, balance, and the Cosmic order of Ma'at. The goddess of war, she also represents the transformative power of kundalini energy, or sekhem, she transforms fear and rage into alchemical gold, the universal medicine for physical, emotional, and soul healing.

The author leads you to an ancient statue of Sekhmet in her chapel at the Temple of Karnak, where you will experience the alchemical process of transformation in the belly of Sekhmet until you are rebirthed as a fully realized adult child of the goddess.

This journey of shamanic death, illumination, and rebirth in the belly of Sekhmet allows you to transform your rage, anger, and fear into creative and constructive solutions that benefit yourself, your community, and the planet.

One Voice, Sacred Wisdom: Revealing Answers to Some of Life's Greatest Mysteries from Your Guides, Spirits and Angels by James Schwartz, 2017

Using a process called alchemical hypnosis, Schwartz has gathered information from clients who were in direct communication with their guides and angels. And from those sessions—about life, death, karma, parallel planes, healing, and why we exist—come new insights that may challenge many of the spiritual beliefs that we have come to accept, including clients experiencing the phenomena of visiting different planes of existence during their hypnosis sessions..

Ancestral Medicine: Rituals for Personal and Family Healing by Daniel Foor, Ph.D. , 2017

Everyone has loving and wise ancestors they can learn to invoke for support and healing. Coming into relationship with your ancestors empowers you to transform negative family patterns into blessings and encourages good health, self-esteem, clarity of purpose, and better relationships with your living relatives.

Dr Foor provides exercises and rituals grounded in ancient wisdom traditions to help you initiate contact with your ancestors, find supportive ancestral guides, cultivate forgiveness and gratitude, harmonize your bloodlines, and assist the dead who are not yet at peace. He explains how to safely engage in lineage repair work to transform intergenerational patterns of pain and abuse and reclaim the full blessings and gifts of their bloodlines.

Lost Scriptures: Books that Did Not Make It into the New Testament

by Bart D. Ehrman – 2003

An anthology of readable translations of many non-canonical writings that have been for the most part lost or neglected for almost two millennia.

This anthology includes fifteen Gospels, five non-canonical Acts of the Apostles, thirteen Epistles, a number of Apocalypses and Secret Books, and several Canon lists.

. Ehrman's introductions helpfully situate the documents in their presumed original settings. An invaluable collection of texts for both students of early Christianity and general readers

The Genesis Race: Our Extraterrestrial DNA and the True Origins of the Species

by Will Hart 2003

Great civilizations suddenly sprang up around the globe from a steady-state human culture. Creation myths tell of gods who fashioned humans in their own image, teaching agriculture and civilized life. The dominant architecture in Egypt, Peru, Mexico, and China was the pyramid, though we have no idea came the advanced knowledge to construct such edifices.

Using current research on DNA, Will Hart shows that these gods were actually visitors from other worlds who genetically engineered modern humanity from the beings that then inhabited the planet. Humanity's current stage of development has finally reached the point where the secret messages of these ancient structures can be decoded.

Study reveals plants 'listen' to find sources of water

A study led by The University of Western Australia has found plants have far more complex and developed senses than we thought with the ability to detect and respond to sounds to find water. They also could tell the difference between the live sound of water and a recording, and did not like the recording.
