CPAK Notes

The Conference on Precession and Ancient Knowledge, held last month, was, as usual, filled with fascinating and interesting presenters. An attendee, Margaret Bartley, will report on the information presented, along with some additional research. Each speaker had only 40 minutes to speak - packed with information, but much more to research.

This summary may lead you to new trails to explore in the ongoing research into the earliest human civilizations, and the secret lineages that still maintain connections to that earlier

The Shamanic Powers of
**ROLLING
THUNDER**
As Experienced by Alberto Villoldo,
John Perry Barlow, Larry Dossey, and Others

The Shamanic Powers of Rolling Thunder: As Experienced by Alberto Villoldo, John Perry Barlow, Larry Dossey, and Others
by Sidian Morning Star Jones and Stanley Krippner Ph.D.

Rolling Thunder (1916-1997) was known for his remarkable healings and ability to call on the forces of nature. He was also a passionate activist who worked to trigger social change on behalf of Native American tribes. He used the money he earned from teaching to construct Meta Tantau, a community in the Nevada desert.

In this book, edited by his grandson Sidian Morning Star Jones and longtime friend Stanley Krippner, we hear directly from people profoundly changed by Rolling Thunder, whether through direct experience or through his teachings.

ENLIGHTENMENT

NOW

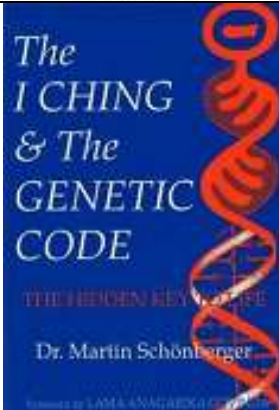

Liberation Is Your
True Nature

Jason Gregory

[Enlightenment Now: Liberation Is Your True Nature](#) [Jason Gregory](#)

In this philosophical, psychological, and spiritual exploration of enlightenment, Jason Gregory addresses how to access the original spontaneous awareness we all came into this world with. He exposes the illusion that we must strive to reach enlightenment, uncovering how our yearning for future accomplishments, attachment to the past, and reliance on authority outside the self are social constructs that distract us from the reality of the now. The author explains how our original enlightened nature has been obscured by social, cultural, religious, and egotistical conditioning of the mind caught in time.

I Ching and the Genetic Code: The Hidden Key to Life by [Martin Schönberger](#)

The universal claims of both the "I Ching", "the book of changes", the compendium of Chinese natural knowledge and the genetic code, "the book of life", encouraged Dr. Schönberger to establish the hypothesis of a general system in nature. He has verified in numerous parallels the congruence of both the I Ching code and the genetic code. The sensational results are detailed for the first time in this book. The "I Ching and the Genetic Code" is an important and exciting link between science and spirituality!

Workshop Forming

Muscle Testing (Kinesiology)

The book [POWER VS. FORCE](#) by David R. Hawkins M.D. Ph.D, uses muscle-testing to answer many questions about ourselves and the world we are in. Kinesiology can be used as a truth detector, and diagnostic tool. This requires at least two people, and time and effort to develop the skill. It helps to have at least three people, so we can do double-blind testing where neither party knows the answer while doing the testing.

If you are interested in forming a group that meets once a month to work on developing your skill, and then using that skill to explore your self, your relationships, and your world, send an email to newsletter@SeattleMetaphysicalLibrary.org, and we can work on finding a mutually acceptable time and date to meet.

This will start after the beginning of 2017, in January or February.

Stop the Attack on Free Internet

I'm glad you got down this far, and are reading this. You are the kind of person who probably cares about maintaining the internet as a valuable source of information.

If, like me, you are an avid reader of internet news, exposés, and reporting sites, you have noticed how stories that are fairly new, say five or six years old, disappear from the web. Very interesting and informative websites that I visited in the 1990s and early 2000s are almost all gone. We have books in our library from 60, 80, even 100 years ago, but, in contrast, the internet is ephemeral.

The internet is our global library. One of the things I've learned is that I have to download stories and media if it is something I want to be able to access later, since things just *poof!* disappear, like in George Orwell's 1984.

New proposals to the internet governing group will allow websites to put digital locks on their content, making it not only impossible to download their media, but also opening up our computers to malware and dangerous content.

This proposal, called Encrypted Media Extensions (EME) is being considered for inclusion by the governing body that controls the web, the World Wide Web Consortium (W3C). It is being pushed by the internet biggies like Netflix, Microsoft, Google and Apple.

The Free Foundation Software group is one of the organizations trying to stop this, and they need people to sign up to protest this. The article is fairly technical, so be forewarned, but the activity is worth supporting. They have a variety of ways to help, you can go to their story at https://defectivebydesign.org/blog/tim_bernerslee_created_sold_out_web
